Spotify is green

We like green. It suits us.

Colour

Spotify Green is our hero colour. We use Spotify Green to clearly signify the presence of Spotify in people's lives, and to help our users immediately identify us. Use this colour generously for our type, Notes, charts and as a background.

We have a select set of supporting neutral colours which help Spotify Green to sing. In the majority of uses, we want strong contrast between all of the colours used.

Solid colours work best in printed applications and for text.

The gradients are best applied in digital applications like our website and email.
